

## Commercial Blenders

Butler TruBlend blenders are ideal for cafés, food-courts, juice bars, restaurants, bars and clubs. Their simplicity lies in their 'easy-touse' manual controls; a variable speed dial and pulse button which allow you to have just as much control as you might want from a professional machine. It crushes ice in seconds in blended drinks and is perfect for making frothy milkshakes, smoothies, frappes, juices and cold coffee. The pulse function can also be used to wet clean the jars after use.

### Technical Specifications
