Pre-immersion

Adjustable
Water Temperature

Electric Shot Timer

Automatic Water Supply
and Drainage System

Painting the Space Like A True Artist Designed to Meet High-Volume De- mands

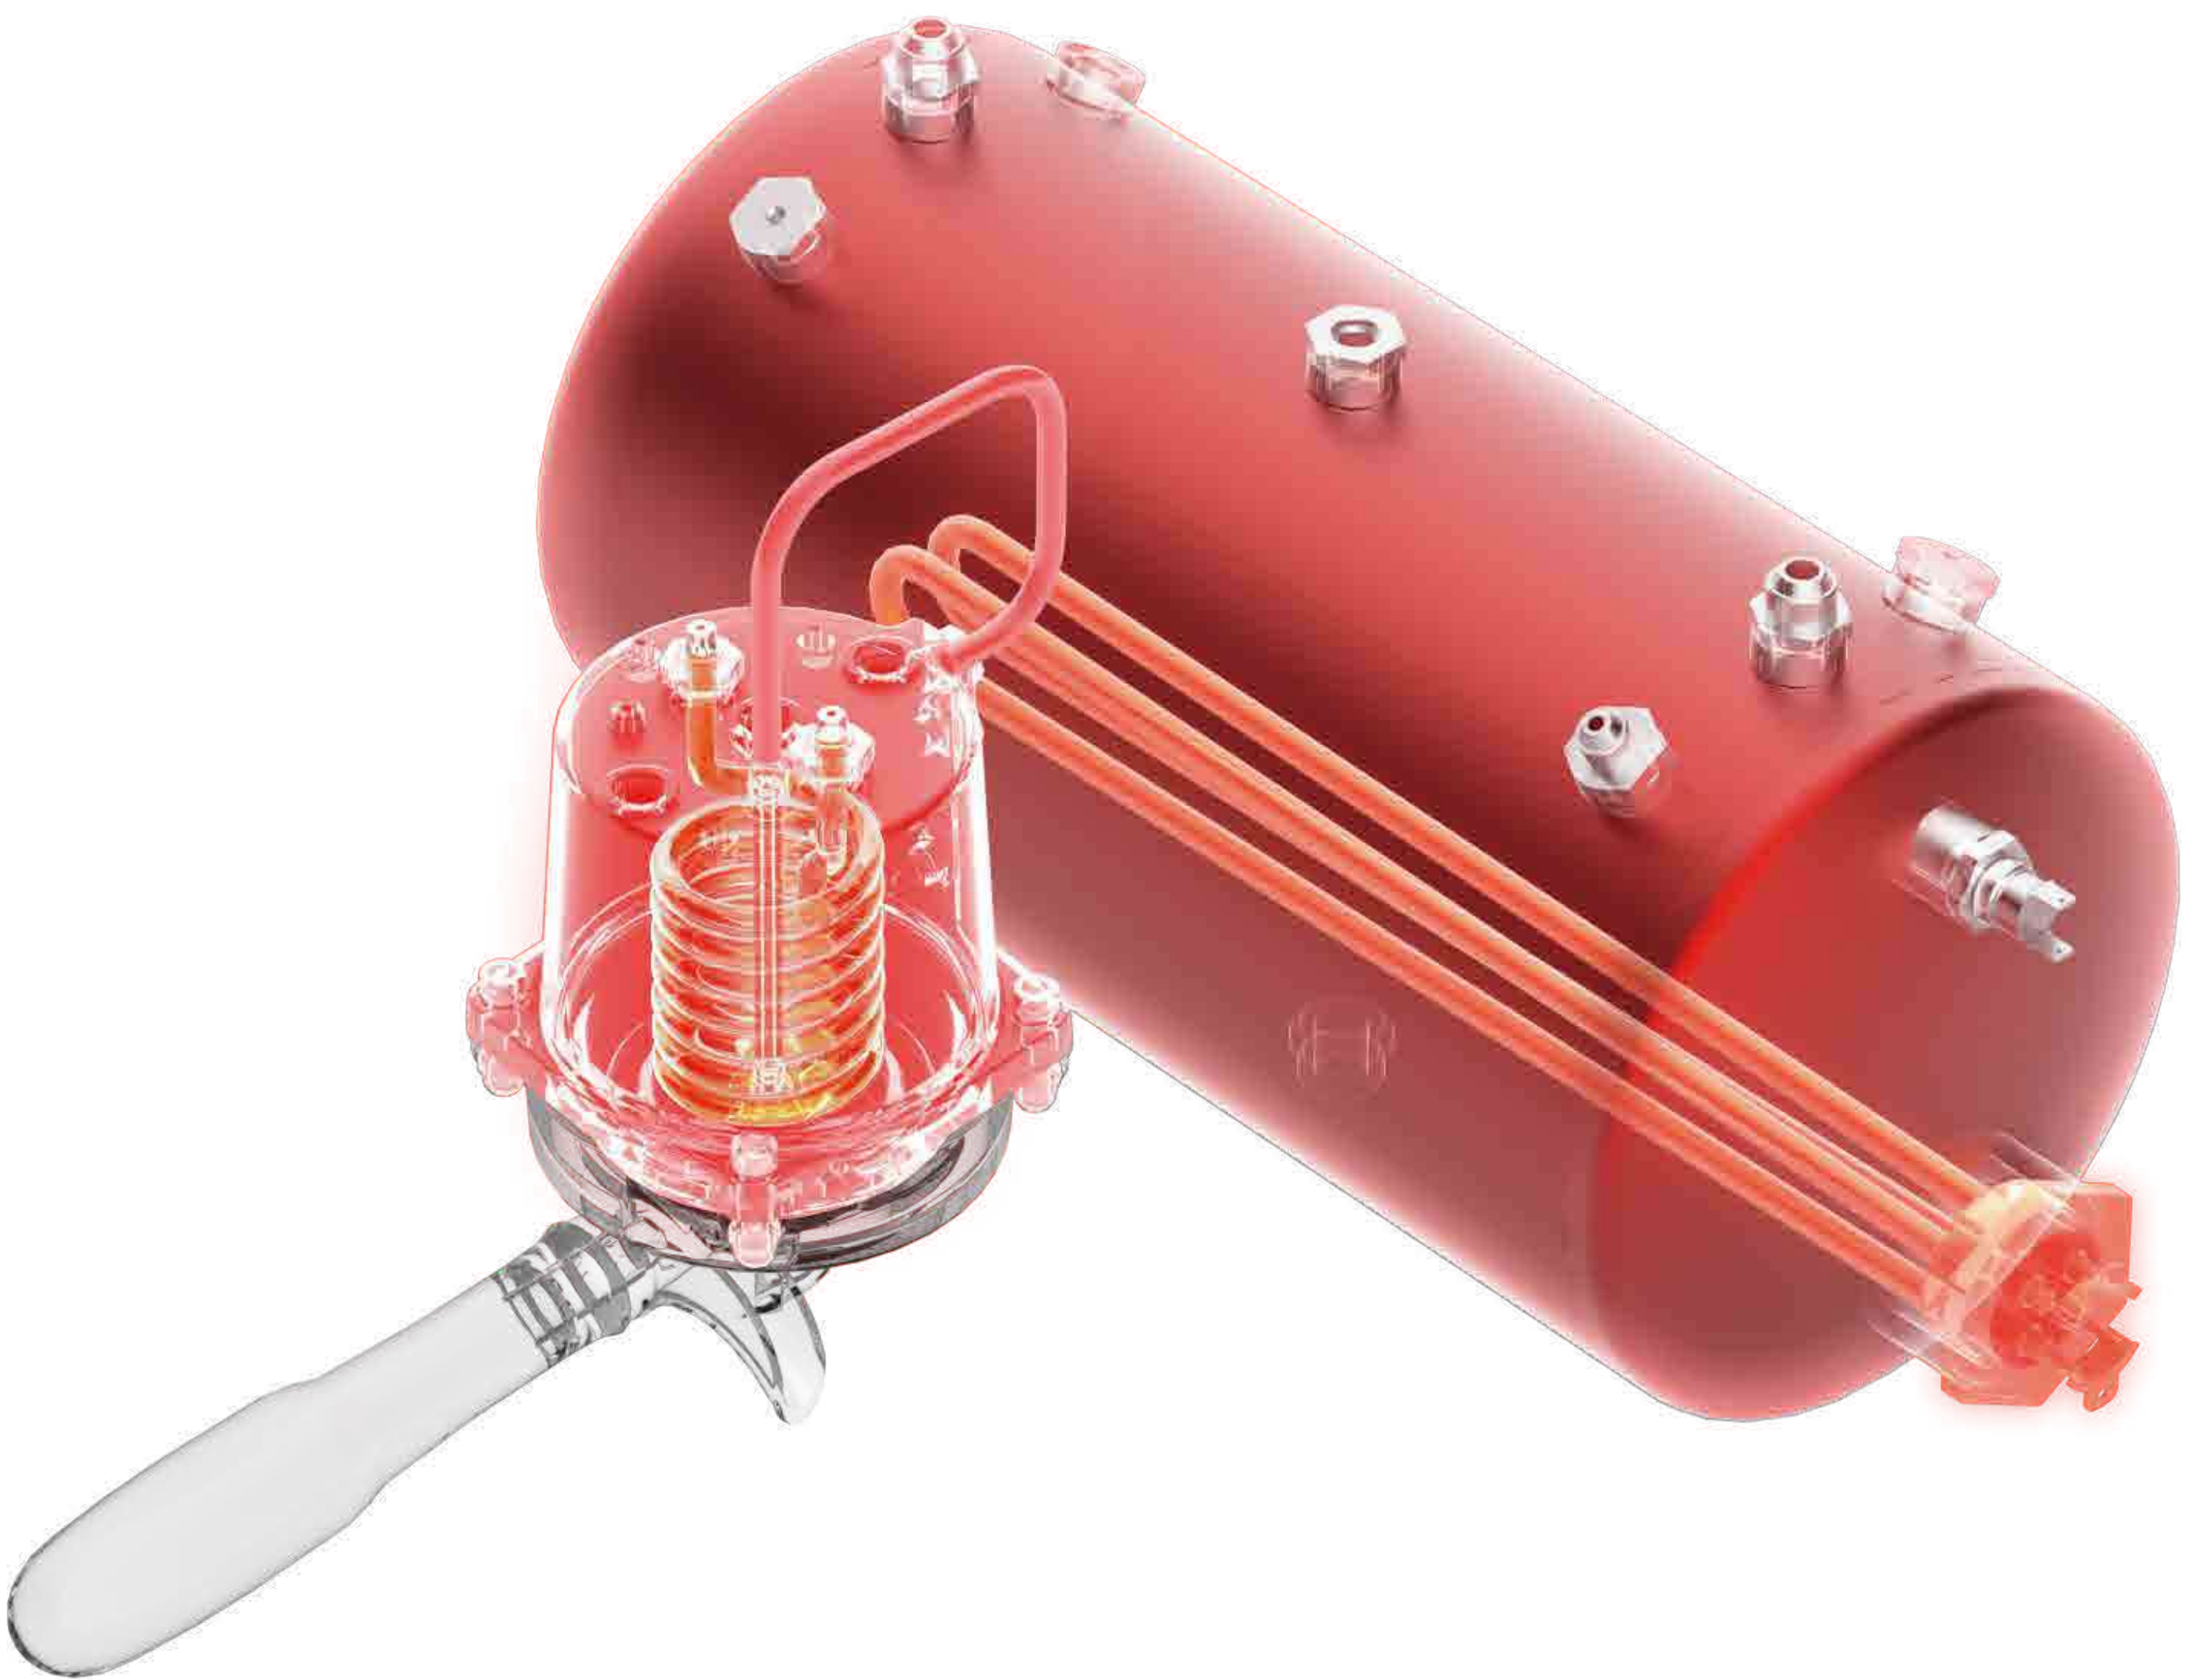

LED Side Panel Light

Illuminated LOGO

Dual Boiler System

550ml complex brew boiler, 5.25L steam boiler
Powerful, core-driven system that delivers fast,
steady shots

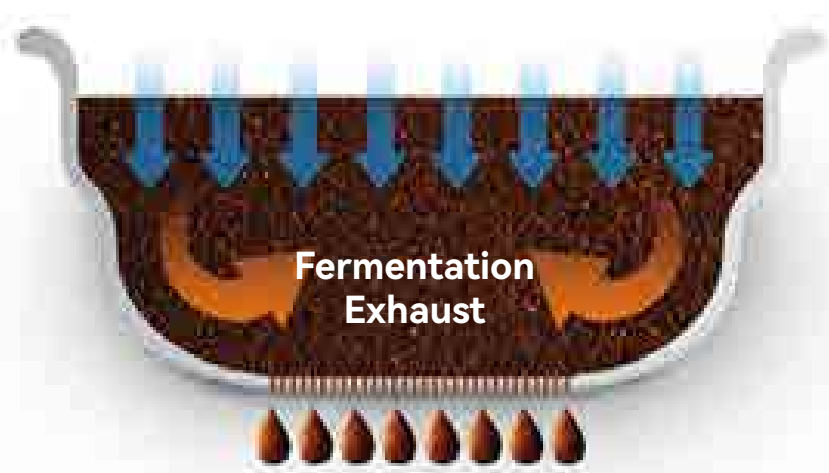

9 Bar Commercial Rotary Pump

Durable, reliable, and operates with minimum noise. Provides continuous and stable output

Customizable Pre-infusion

Adjustable pre-infusion time
Customize your extraction and discover a world
of unique, rich flavors

Pre-infusion

Soaking the coffee powder in advance helps increase extraction, prevents channeling and gives your coffee a richer, more balanced flavor

Without Pre-infusion

Not soaking the coffee powder in advance will lead to inconsistent extraction, and your coffee will taste lighter and less aromatic

Commercial Brewing Quality

Efficient and consistent, designed to meet bustling, high-volume commercial demands

360° Universal 4-hole Steam Wand

Plentiful dry steam containing little water
Delivers smooth, creamy milk froth, and creates
a rich, harmonious blend of milk and coffee

Refined Energy-Saving Techniques

All-copper water pipes for increased boiler efficiency. Brew boiler switch button, open on demand
